

# Arthur Lawrence SAP Services

Organizations of all sizes utilize SAP product suite to reduce cost, improve performance, and gain agility to respond to the challenging business needs. In an era of increased economic pressures, organizations that have implemented SAP enterprise solutions are looking for new ways to leverage their SAP investments and create tangible value. To succeed in global markets you need to find innovative ways to streamline your business processes and get the most value from your people, your assets and your customers.

Despite starting with the same products, organizations achieve differing outcomes. Organizations that focus on using their enterprise systems not just to control costs, but to create distinctive capabilities, will establish the basis for competitive differentiation and growth.

Improving the integration and performance of your systems and processes supports:

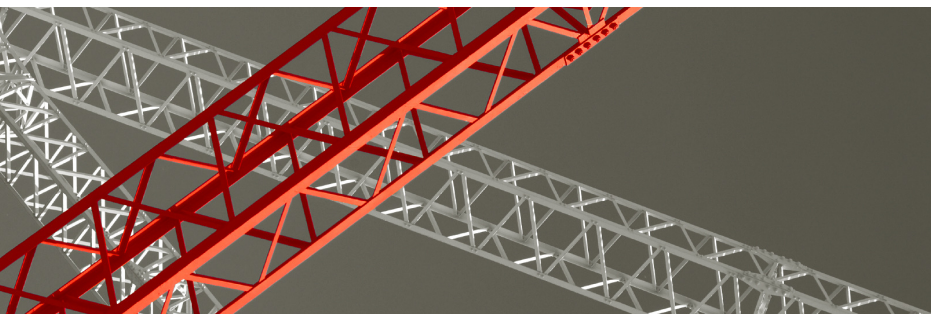

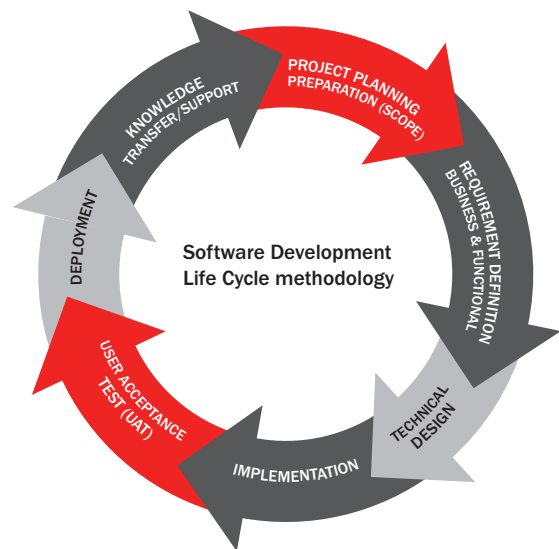

- greater customer value
- the best people
- high-performing assets
- collaborative innovation

Arthur Lawrence Consulting provides a broad range of consulting services that help clients make their business transformation initiatives a success. We can customize the right solution to address your business requirements.

Our experts assist clients with the design, build and management aspects of their transformation by looking at the three cornerstones of an organisation - Processes, People and Technology and adopting best practices and industry standards to bring about process improvements. This involves changes ranging from process improvement to process re-design, which are applicable across all industries.

## Your Trusted Partner – for all SAP needs!

Working closely with our customers, we build an understanding of their needs, advise how SAP technology can address these and provide the solutions, together with the education and support to ensure their effective deployment. Through our process of value creation, we deploy SAP's latest technology and functional innovations to give you quick and easy access to unrivalled skills and experience, helping you make the most of your SAP solutions, assuring quality, mitigating risk and protecting the value of your investment in SAP.
